Company Overview

Milestone Project Controls Group, LLC is a Service-Disabled Veteran-Owned Small Business (SDVOSB) specializing in project controls and Primavera P6 schedule development and analysis. We support complex, high-consequence capital programs by developing structured, forward-looking schedule systems that improve visibility, identify variances early, and support informed decision-making across the project lifecycle. Our focus is on building and maintaining schedule integrity through disciplined planning, critical path management, and performance-driven controls.

Core Competencies

- **Project Planning & Schedule Architecture:** Development and maintenance of Primavera P6 schedules with emphasis on critical path logic, baseline integrity, and execution alignment.
- **Earned Value Management (EVM) & Performance Analysis:** Integration of cost and schedule data to assess project performance, forecast Estimates at Completion (EAC), and identify emerging performance trends.
- **Schedule Analysis & Predictive Modeling:** Scenario-based schedule analysis (“what-if” modeling) to evaluate potential impacts of scope, resource, and sequencing changes prior to execution.
- **Federal Project Controls & Reporting Compliance:** Development of schedules and reporting structures aligned with federal project controls standards, including DCMA 14-point assessment criteria and agency-specific requirements.

Differentiators

- **Service-Disabled Veteran-Owned Small Business (SDVOSB):** Certified SDVOSB through the U.S. Small Business Administration, supporting federal small business and set-aside procurement requirements.
- **Veteran-Led Execution Discipline:** Led by a U.S. Army Infantry Non-Commissioned Officer with five years of operational leadership experience in high-pressure, resource-constrained environments requiring precise coordination and risk awareness.
- **Predictive Controls Focus:** Emphasis on forward-looking schedule management, focusing on early identification of variance, schedule health, and execution risk before impacts occur.
- **Professional Qualifications:** Bachelor of Science in Finance and active Project Management Professional (PMP) certification, combining quantitative analysis with structured project execution methodology.

Past Performance

- **U.S. Department of Energy – National Laboratory:** Supported project planning and controls for high-consequence federal programs, including schedule development, baseline maintenance, and performance tracking in complex technical environments.
- **U.S. Army – Infantry Operations (Non-Commissioned Officer):** Led operational planning, resource coordination, and mission execution in dynamic environments requiring disciplined scheduling, risk management, and real-time decision-making under pressure.

Corporate Information

- **Business Structure:** Limited Liability Company (LLC), Service-Disabled Veteran-Owned Small Business (SDVOSB)
- **Primary NAICS Codes:**
 - 541611 – Administrative Management and General Management Consulting Services
 - 541990 – All Other Professional, Scientific and Technical Services
